Journal of Quantitative Spectroscopy & Radiative Transfer 78 (2003) III–V

Journal of Quantitative Spectroscopy & Radiative Transfer

www.elsevier.com/locate/jqsrt

List of Contents

NUMBER 1

R. Engleman Jr., K.H. Hinkle and L. Wallace 1 The near-infrared spectrum of a Th/Ar hollow cathode lamp

B.A. Shakhov and M. Stehlik 31 The Fokker–Planck equation in the second-order pitch angle approximation and its exact solution

C.P. Rinsland, A. Goldman, T.M. Stephen, L.S. Chiou, E. Mahieu and R. Zander 41 SF_6 ground-based infrared solar absorption measurements: long-term trend, pollution events, and a search for SF_5CF_3 absorption

A. Okur, Y. Özdemir and R. Durak 55 Qualitative and quantitative analysis of pathological and non-pathological human bone using radioisotope X-ray fluorescence technique

D.B. Sinars, S.A. Pikuz, T.A. Shelkovenko, K.M. Chandler, D.A. Hammer and J.P. Apruzese 61 Time-resolved spectroscopy of Al, Ti, and Mo X pinch radiation using an X-ray streak camera

I.N. Polonsky, M.A. Box and A.B. Davis 85 Radiative transfer through inhomogeneous turbid media: implementation of the adjoint perturbation approach at the first order

Z.N. Begum 99 A theoretical investigation of radiative effects and microphysical processes involved in the interaction of aerosol particulates in the atmosphere and validation of the theoretical results with the INDOEX observations

M.A. Box, I.N. Polonsky and A.B. Davis 105 Higher order perturbation theory applied to radiative transfer in non-plane-parallel media

Notes

F.O. Borges, G.H. Cavalcanti and A.G. Trigueiros 119 Weighted oscillator strengths and lifetimes for the S IX and S X spectra

B. Saha, P.K. Mukherjee, D. Bielińska-Wąż and J. Karwowski 131 Time-dependent perturbation calculations for transition properties of two-electron atoms under Debye plasma

NUMBER 2

L.H. Liu and **G.L. Man**	139	Reconstruction of time-averaged temperature of non-axisymmetric turbulent unconfined sooting flame by inverse radiation analysis
H. Jinbo, R. Liming and **T. Heping**	151	Effect of anisotropic scattering on radiative heat transfer in two-dimensional rectangular media
B. Ertugral, U. Cevik, E. Tirasoglu, A.I. Kopya, M. Ertugrul and **O. Dogan**	163	Measurement of K to L shell vacancy transfer probabilities for the elements $52 \leqslant Z \leqslant 68$
M. Sneep and **W. Ubachs**	171	Cavity ring-down measurement of the O_2–O_2 collision-induced absorption resonance at 477 nm at sub-atmospheric pressures
A. Quirantes and **Ángel Delgado**	179	Cross section calculations of randomly oriented bispheres in the small particle regime
W.E. Vargas	187	Optical properties of pigmented coatings taking into account particle interactions
M. Ščepanović and **J. Purić**	197	Stark widths dependence on the upper level ionization potential and the rest core charge of the emitter within $3s$–$3p$ and $3p$–$3d$ transition arrays
O. İçelli, S. Erzeneoğlu and **R. Boncukçuoğlu**	203	Measurement of mass attenuation coefficients of some boron compounds and the trommel sieve waste in the energy range 15.746–40.930 keV
Z. El-Gohary and **A.A.M. Habib**	211	The influence of the background interference on the escape of photons in atomic absorption measurements
S. Magnier and **M. Aubert-Frécon**	217	Theoretical determination of the K_2^+ electronic structure
L.H. Liu	227	A concept of multi-scale modeling for radiative heat transfer in particle polydispersions
T. Viik and **N.J. McCormick**	235	Numerical test of an inverse polarized radiative transfer algorithm
C. Tezcan, A. Kaşkaş and **M.Ç. Güleçyüz**	243	The H_N method for solving linear transport equation: theory and applications
Note		
Z. Shippony and **W.G. Read**	255	A correction to a highly accurate Voigt function algorithm

NUMBERS 3–4

K.M. Lata, K.V.S. Badarinath, T.V.R. Rao, R.R. Reddy, Y.N. Ahammed, K.R. Gopal and **P.A. Azeem**	257	Studies on aerosol optical properties over urban and semi-urban environments of Hyderabad and Anantapur
M.H. Sellami, A. Hassen and **M.S. Sifaoui**	269	Modelling of UV radiation field inside a photoreactor designed for wastewater disinfection Experimental validation

R.R. Gamache and **J. Fischer** 289 Half-widths of $H_2^{16}O$, $H_2^{18}O$, $H_2^{17}O$, $HD^{16}O$, and $D_2^{16}O$: I. Comparison between isotopomers

R.R. Gamache and **J. Fischer** 305 Half-widths of $H_2^{16}O$, $H_2^{18}O$, $H_2^{17}O$, $HD^{16}O$, and $D_2^{16}O$: II. Comparison with measurement

Ye. Grynko and **Yu. Shkuratov** 319 Scattering matrix calculated in geometric optics approximation for semitransparent particles faceted with various shapes

H.E. Brindley and **J.E. Harries** 341 The impact of instrument field of view on measurements of cloudy-sky spectral radiances from space: application to IRIS and IMG

J.-Y. Mandin, V. Dana, D. Jacquemart, N. Picqué and **G. Guelachvili** 353 Multispectrum processing approach of weak H_2O profiles recorded with absorption paths ranging from 20 to 120 km

A. Elgarayhi and **A. Elhanbaly** 365 On the condensational growth, removal and diffusion processes of aerosols

L.H. Liu 373 Domain isolation concept for solution of radiative transfer in large-scale semitransparent media

T.von Clarmann, M. Höpfner, B. Funke, M. López-Puertas, A. Dudhia, V. Jay, F. Schreier, M. Ridolfi, S. Ceccherini, B.J. Kerridge, J. Reburn and **R. Siddans** 381 Modelling of atmospheric mid-infrared radiative transfer: the AMIL2DA algorithm intercomparison experiment

U. Çevik, E. Ergen, G. Budak, A. Karabulut, E. Tirąoğlu, G. Apaydin and **A.I. Kopya** 409 Elemental analysis of Akçaabat tobacco and its ash by EDXRF spectrometry

L.P. Giver, L.R. Brown, C. Chackerian Jr. and **R.S. Freedman** 417 The rovibrational intensities of five absorption bands of $^{12}C^{16}O_2$ between 5218 and 5349 cm^{-1}

H.-S. Li, H.-C. Zhou, J.-D. Lu and **C.-G. Zheng** 437 Computation of 2-D pinhole image-formation process of large-scale furnaces using the discrete ordinates method

Y. Özdemir, İ. İyigün and **R. Durak** 455 Qualitative and quantitative analysis of bones in adult rats by repeated intraperitoneal administration of paclitaxel (taxol) using radioisotope EDXRF technique

P.S. Antsiferov 463 The natural profile of the transitions originating from the autoionization states

M. Wang 471 An efficient method for multiple radiative transfer computations and the lookup table generation

P. Ben-Abdallah and **B. Ni** 481 Radiative transfer in strongly lossy inhomogeneous thin films

Corrigendum

Y. Huang, X.-L. Xia and **H.-P. Tan** 489 Corrigendum to "Temperature field of radiative equilibrium in a semitransparent slab with a linear refractive index and gray walls" [JQSRT 74(2002) 249–261]
